

Position Description: Software Engineer (Indonesia)

The Opportunity

Cignifi (www.cignifi.com) is a fast-growing US fin-tech company backed by leading venture capital firms. We have developed the first proven analytic platform to deliver credit and marketing scores for consumers using mobile phone behavior data. We are in a period of rapid growth and are looking for a Software Engineer to be part of our team based in Jakarta. The candidate will monitor and maintain key software deployments and provide support to customers using Cignifi's platform.

Key Responsibilities:

- Gather and analyze customers' requirements
- Design and implement advanced credit platform
- Monitor and maintain advanced credit platform and workflow
- Address any customer related issues
- Troubleshoot and resolve installation, implementation, and production issues
- Provide world-class support to customers and partners through responsive, proactive, and professional interactions

Skills & Qualifications:

- Bachelor's degree in computer science or related fields
- 2 years+ experience in JAVA, SQL, web technologies
- Good knowledge of Linux and networking
- Experience with Restful APIs and Web Services
- 2 years+ experience with production support
- Ability to work effectively with global, remote, project teams across different time zones
- Strong written and oral communication skills in English.
